### **\*\*Notification\*\***

Due to the individual purpose of using the car by various customers, Aeromaster Sports Cars builds only component kits for our customers, that means we can provide kits or vehicles to any stage of completion, but a turnkey car. That is why we created the semi-production car which a completed car except the drivetrain and some mechanical parts.

Buying such a car means you can get a finished car as fast as possible, with factory-built quality, we have done all heavy assembly works and provide cars to this level, for you or another party to just add a drivetrain.

Despite the race-inspired design, our car is strictly followed the original LMP racing shape but supplied with "E" marked glass windshields, "E" marked taillights.

If you are planning to register the car on the street, consult with us during the order process, and be sure to check with your local registration authority before you purchase a car, that the specific car you have chosen, with the options you have selected, can be registered. Because countries vary, and drivetrain choices sometimes drive registration issues, Aeromaster Sports Cars cannot warrant that any car in particular can be registered for the street in your state.
